Jefferson, GA 30549

(706) 367-5121

The City of Jefferson, Georgia is undertaking numerous water system improvement programs. This includes a 4.0 MGD reservoir project, a water treatment facility expansion program to 4.0 MGD, and associated raw and finish water lines.

Principals of Engineering Management, Inc. are working closely with State and local officials in developing permitting for the reservoir, as well as providing preliminary planning for the water treatment plant expansion program. Certain water line aspects of the project are also in the design and permitting phase.

Services provided include preliminary planning, engineering, interagency coordination, permitting, assistance in land acquisition, project management and project observation.
